

Henry James Gavagan Reith

170 W 23rd 6H, New York, New York | 410-991-0402 | henryreith12@gmail.com | henry.reith@mccarren.ai

Experience

CO-FOUNDER, MCCARREN AI | JANUARY 2024 – PRESENT

- McCarren builds AI agents to help government contractors win government contracts.
- Built GTM engine consisting of outbound motions, distribution partners & in person events.
- Sold enterprise contracts at ~45k ACV & SMB at ~12k ACV closing on half a million ARR with 67.7% MoM growth (99th Stripe percentile)
- Built & grew Doco, an AI Agent in Microsoft to 3,000 users on freemium tier (deprecated to focus on enterprise)

TECHNICAL ADVISOR AT FLYWHEEL DIGITAL | DECEMBER 2022 – DECEMBER 2023

- Worked directly under Patrick Miller, Co-Founder & President of Flywheel Digital, as Technical Advisor.
- Managed a team of 5 research engineers to build and develop early-stage products for the organization.
- Developed relationships with Amazon Account Executives and Customers to build case studies to expand partner network and drive inbound.
- Supported Omnicom's Strategy team on M&A doing diligence on startups technological capabilities and assessing if and where they fit within the larger Omnicom network.

SR DATA SCIENTIST AT FLYWHEEL DIGITAL | AUGUST 2020 – NOVEMBER 2022

- 2021 Innovator of The Year.
- Trained sequential neural net to predict stochastic sales volume for multi-million dollar manufactures on the Amazon.com platform.
- Designed and operationalized decision tree-based classification models to understand correlation within sales analysis. Perform ETL processes to collect, aggregate and visualize large volumes of data utilizing parallelization, distributed compute and optimization techniques on Databricks GPU clusters and AWS GPU clusters via SageMaker.
- Manage the entire life cycle of projects starting with building requirements, collecting and cleaning data, training and testing models, performing quality assurance, and effectively communicating the findings.

BUSINESS DEVELOPMENT ANALYST AT FLYWHEEL DIGITAL | JANUARY 2019 – JULY 2020

- Developed and presented pitch decks for prospects in pipeline working closely with Amazon partner network.
- Built sales forecast and financial models for leadership to support strategic business decisions.
- Developed large-scale automated reporting and visualizations for customers utilizing SQL, Tableau, Excel etc.

ANALYST AT FLYWHEEL DIGITAL | SUMMER 2016, SUMMER 2017

- Employee #6 at Flywheel, an early-stage startup established in 2014 specializing in analytics and search optimization on Amazon. Flywheel grew to 2,000 employees and sold to Omnicom for \$835M.

Education

MS, ARTIFICIAL INTELLIGENCE – *JOHNS HOPKINS UNIVERSITY. 2020-2023.*

- Published AI Research, JHU Department of Neurology. Trained CNNs with eye tracking data to predict and detect neurological disease such as stroke or MS.
- Course load consisted of Artificial Intelligence, GPU Programming, Creating AI-enabled systems, ML for Signal Processing, Cloud Computing, NLP, Deep Learning for Computer Vision etc.

BS, MATHEMATICS - *COLLEGE OF CHARLESTON, CLASS OF 2018.*

- Accompanied graduate level students while developing prediction software using athlete statistics and historical data to predict Mixed Martial Arts bouts. Applied Machine learning techniques such as decision tree classification & k-means clustering.
