Experience

CO-FOUNDER & CTO | [MCCARREN AI](#) | FEBRUARY 2024 – PRESENT

- Architected and shipped [Doco](#), an AI native Microsoft Word agent used by 3,000+ users, built with TypeScript, React, Vite, Microsoft Office.js, MongoDB, and AWS.
- Built retrieval and agentic workflows for opportunity discovery, document search, RFP response generation and automated proposal editing.
- Led product development and customer implementation for enterprise contracts averaging \$45K ACV and SMB contracts averaging \$12K ACV.
- Managed GTM strategy across outbound sales, partnerships, and industry events.

SENIOR MANAGER, TECHNICAL ADVISOR | FLYWHEEL DIGITAL | FEBRUARY 2022 – JANUARY 2024

- Led a team of five engineers building greenfield AI products for major consumer brands, including content generation and enterprise workflow automation tools.
- Partnered with customers to identify automation opportunities and translate business requirements into production data and AI products.
- Advised leadership on post-acquisition product strategy, technical architecture, and integration priorities across newly acquired companies.
- Evaluated capabilities and product positioning of acquisition targets for Omnicom's strategy team.

SENIOR DATA SCIENTIST | FLYWHEEL DIGITAL | AUGUST 2020 – JANUARY 2022

- Built Python and SQL pipelines to collect, validate, aggregate, and visualize large datasets using distributed computing on Databricks and AWS SageMaker.
- Built predictive models for sales forecasting, market share estimation, keyword search volume, and advertising bid optimization for multinational consumer brands across Amazon and Walmart.
- Named Flywheel Digital's 2021 Innovator of the Year.

BUSINESS ANALYST | FLYWHEEL DIGITAL | JANUARY 2019 – JULY 2020

- Partnered with enterprise brands to develop reporting and analytics products that informed e-commerce and advertising strategy.
- Built sales forecast and financial models for leadership to support strategic planning.

Education

MS, ARTIFICIAL INTELLIGENCE | JOHNS HOPKINS UNIVERSITY | 2020-2023

- [Research Contribution](#), JHU Department of Neurology. Trained convolutional neural networks with eye tracking data to predict and detect neurological disease.
- Focus areas included deep learning, NLP, distributed systems, GPU programming and AI system design.

BS, MATHEMATICS | COLLEGE OF CHARLESTON | CLASS OF 2018

- Developed software using athlete historic data to predict outcomes of Mixed Martial Arts bouts.

Technical Skills

Languages: Python, SQL, TypeScript/JavaScript, C#, C++, R, MATLAB

App Dev: React, Next.js, Node.js, Vite, Bun, REST APIs, GraphQL, WebSockets, Microsoft Office.js

Cloud, Data & AI: AWS, Azure, GCP, Databricks, PostgreSQL, MongoDB, Snowflake, Supabase, Redis, Docker, Linux, CI/CD, CUDA, PySpark, PyTorch, TensorFlow, Vercel AI SDK
